26 Dec 1981 . Most tape manufacturers guard their particular formula for this layer as jealously as a Mexican cook guards his personal recipe for chili sauce, and it's these proprietary formulas that are mainly responsible for the slightly different sound of each cassette brand. For many years, there were just two basic types.

17 Sep 2011 . Example: This bundle of a few audio cassettes (wow, remember those?) on the uber-boring topic of human development. I scanned it and picked it up at a library sale for \$2. My scanner said the sales rank was 3.8 Million, with just a few competing sellers. So I put it on Amazon about 2 weeks ago and it just.

6 Nov 2017 . They are actually making three different audio cassettes: 731/831 'Music grade', 751 chrome high performance and 799 Studio master super Chrome. actual blank . But the interesting thing about this is that they said they are preparing a new formula for a high performance ferric tape (see minute 2:56):.

Chromium dioxide or chromium(IV) oxide is an inorganic compound with the formula  $\text{CrO}_2$ . It is a black synthetic magnetic solid. It once was widely used in magnetic tape emulsion. With the increasing popularity of CDs and DVDs, the use of chromium(IV) oxide has declined. However, it is still used in data tape applications.

This is a cataloger decision and there is no formula for deciding. Series (RDA . AACR2 uses "sound cassettes" for cassette tapes; RDA uses "audiocassettes" (a single word). If the format . The standard size for audiocassettes is 3 7/8 x 2 1/2 in., 1/8 in. tape (RDA records both the cassette width x height and the tape width).

BASF made two IEC I reference tapes. The first was a former DIN tape adopted by the IEC, and it was superseded by a better ferric oxide formula later on. There were three IEC II reference tapes: 1) was a former DIN chrome; 2) the second was a significantly improved

chrome; and 3) the last was a ferric-cobalt tape.
