Descripción

Una fascinante investigación sobre el virus del Ébola, sus orígenes y sus agentes transmisores a partir de testimonios, entrevistas y diálogos con los expertos más importantes. La historia del virus mortal que mantuvo en vilo al mundo entero.

En 1976 un virus letal apareció en la selva del Congo. Desapareció tan veloz como había llegado, sin dejar ningún rastro. A lo largo de las últimas cuatro décadas, el virus del Ébola se ha manifestado esporádicamente, siempre con un efecto terrible, ya que puede matar hasta al 90% de sus víctimas. Entre una epidemia y la siguiente es indetectable, oculto en la profundidad de la selva, y la búsqueda del animal que le sirve de huésped aún no arroja resultado. Hasta que no lo averigüemos, el ébola seguirá matando.

David Quammen, uno de los mejores exploradores y escritores científicos del mundo, vivió su primer acercamiento a la enfermedad mientras visitaba la jungla de Gabón acompañado por unos guías locales cuya aldea había sido devastada por una epidemia reciente. En este libro cuenta la historia del virus del Ébola, de su pasado, su presente y su incierto futuro.

Reseñas:

«Una aterradora y fascinante obra maestra de divulgación científica que se lee como una historia de suspense.»

Walter Isaacson

«Riguroso como un artículo de *Nature*, informativo como un buen reportaje periodístico, ameno como una novela de aventuras, intrigante como el mejor *thriller*. Así es *Ébola*, ejemplo perfecto de que la divulgación científica puede ser un placer para lectores

exigentes.»

Javier Pérez de Albéniz en El Descodificador

«David Quammen es una estrella deslumbrante de la literatura científica.»

Edward O. Wilson

«Un libro espléndido que nos explica todo lo que sabemos y todo lo que ignoramos sobre esta aterradora enfermedad.»

Nick Stockton, *Wired*

«David Quammen es un maestro.»

Bill Bryson

«Quammen no es solo uno de nuestros mejores escritores científicos, es uno de nuestros mejores escritores sobre cualquier tema.»

New York Times

1 Oct 2014 . Congressional candidates in mid-Michigan appeared together in a debate Tuesday night. The 8th District candidates were asked about the usual topics, and.

6 Aug 2014 . A panel of World Health Organization ethicists will discuss whether to use experimental drugs in the West African Ebola outbreak that has killed 932 people since March. Two American patients have received an experimental Ebola drug called ZMapp made by Mapp Pharmaceuticals, a 9-person company.

26 Feb 2015 . The Ebola virus epidemic has led to a “seismic political shift” in international attitudes to global health security, says Brian McCloskey, adviser to the United Nations' special envoy on Ebola. McCloskey, who is on secondment from his job as director of global health at Public Health England, told a debate at.

17 Nov 2014 . Christos Stylianides, the commissioner for humanitarian aid, will today discuss the situation in Ebola-affected countries with the EP's development committee, following his

fact-finding mission to West Africa. The meeting focuses on assessing progress and identifying what further measures are needed to.

18 Apr 2015 . Ebola and Polio are not just public health issues, but have become threats to the economy and development of the affected countries. Cameroon started an initiative to fight with a massive communication campaign.

22 Aug 2017 . A DEBATE over an alleged Ebola joke made by England women's football team Mark Sampson sparked a heated row between two callers during Nick Ferrar's LBC show.

17 Oct 2014 . Rep. Bruce Braley, the Democratic candidate, scored points from having just attended a Washington congressional hearing on Ebola, one expert says. Republican state Sen. Joni Ernst criticized the administration for being 'reactive rather than proactive.'

27 Oct 2014 . Over the weekend, the debate dominated headlines: should states enact a policy for quarantining and isolating individuals potentially exposed to Ebola? New York, New Jersey, and Illinois had already answered "yes"; others, including President Obama, and the Director of the National Institute for Allergy.

24 Feb 2015 . The 2014 Ebola outbreak in West Africa was the worst since the disease was identified in 1976. As case numbers seem to be on the decline, we ask on a special BBC World Debate - what has been the impact and consequences of Ebola in West Africa. What do the people of West Africa need now, from.

17 Aug 2014 . NAIROBI, Kenya -- The Kenyan government over the weekend said it will bar passengers travelling from three West African countries hit by the Ebola outbreak, closing a debate in East Africa's economic powerhouse about whether the national airline was exposing the country to the deadly disease.

30 Oct 2014 . The U.S. Ebola debate Thursday centered on a small town in Maine, a governor vowing to use the "full extent" of his power to quarantine a humanitarian nurse, and the defiant nurse herself taking a rogue bicycle ride. Maine Gov. Paul LePage (R) said he plans to turn to legal measures to force Kaci Hickox,.

10 Aug 2014 . Experts are meeting at the request of the World Health Organization to debate whether it is ethical to use experimental Ebola therapies in this epidemic.

Ebola is a deadly disease. People suffering from it experience a variety of symptoms, ranging from headache and diarrhea to bleeding to organ failure. A large proportion of the people who catch Ebola die from it. The year 2014 saw the largest outbreak of the Ebola virus in history. It swept across multiple countries in West.

22 Jan 2015 . The Book on Ebola, Part I Ebola Book David Quammen. Early on in the debate over travel restrictions, you warned of the dangers of such isolationist measures. Why are quarantine measures announced by states a bad idea? It stirs complex conflicts involving civil liberties as well as public health, which.

And those medical volunteers are less likely to sign up for a tour at the epicenter of the Ebola epidemic if they have no hope of repatriation when they fall ill. A video (link is external) The New York Times shot inside an Ebola ward in Liberia, which Dohrn plays during the debate, helps bring current conditions with their lack of.

31 Oct 2014 . The fight over Ebola quarantines in the United States is already discouraging doctors, nurses and other health workers from going to Africa. NBC News reports.

6 Aug 2014 . The death toll in the Ebola outbreak has climbed above 900. In response, the World Health Organization will look into whether it's ethical to use experimental medicines in the outbreak.

2 Oct 2014 . Countries in West Africa have been struggling to stop what has become the largest Ebola outbreak ever recorded. Now, with the first case diagnosed in the United States, health officials are scrambling to prevent the disease from infecting more people. What needs

to be done and what lessons have been.

1 Dec 2014 . But is it ethical for the drugs to be given in randomized, controlled trials — considered the gold standard in methodology — since that would require some patients to take placebos? How can the development and testing of Ebola drugs and vaccines be accelerated while respecting ethical standards?

This is the first part of the Simulation Seminar on the theme of 'Domestic and International Responses to Ebola and Terrorism in Africa: Whose agenda is it anyway?'. In this simulation seminar, fellows debate on issues of the Ebola crisis in West Africa. The debates are an excellent tool to help understand the problems that.

16 Feb 2015 . The one good thing to come from the Ebola outbreak in west Africa is a fresh debate on the urgency of improving access to basic healthcare and, in turn, the need for moves towards universal healthcare coverage. Years of neglect of prevention and treatment help explain why the lethal infection claimed.

Marburg, Ebola Filovirus Vaccine Program has developed novel vaccine technology to create vaccines against all deadly subtypes of Marburg and Ebola. Utilizing previous DOD funding, the program has worked with the Army to develop over 30 Marburg and Ebola vaccine candidates. These studies, conducted by the U.S..
